Kevin Malone Sr. (1937-2019)

## LABOR RELATIONS BULLETIN

#2-23

January 5, 2023

**TO:** All NAEC Members

**FROM:** Tim Conway

**SUBJECT:** AB 1851 – HAULING OF MATERIAL

At its' November General Membership Meeting, NAEC members were made aware of the passage of Assembly Bill 1851 in September, which amends the California labor code relating to prevailing wages for on-haul trucking on public works projects.

Labor attorney Dennis Cook subsequently reached out to the Department of Industrial Relations on behalf of NAEC to determine the status of the implementation of the new requirements for onsite hauling. The DIR indicated that they will be reviewing the new legislation and will advise the industry stakeholders in the near future to prevent unnecessary confusion regarding the application of AB 1851 to current and future projects. We were hopeful that the DIR would clarify their interpretation of AB 1851 for the industry by January 1, 2023, which did not occur.

Dennis also learned that some associations are advising their contractors that AB 1851 does not contain language that warrants any change to the existing prevailing wage standard.

The NAEC will apprise you of any updates it receives in this regard.
